Tasks To Be Performed:

1. Create a VM without public IP address
2. Connect to this VM using bastion host

Home > Compute infrastructure | Virtual machines >

Create a virtual machine

Help me choose the right VM size for my workload | Help me create a low cost VM

Validation passed

Delete OS disk with VM	Enabled
Ephemeral OS disk	No

Networking

Virtual network	vnet-eastus
Subnet	snet-eastus-1
Public IP	None
Accelerated networking	On
Place this virtual machine behind an existing load balancing solution?	No
Delete NIC when VM is deleted	Disabled

Management

Microsoft Defender for Cloud	None
System assigned managed identity	Off
Login with Microsoft Entra ID	Off
Auto-shutdown	Off
Enable periodic assessment	Off
Enable hotpatch	Off

Your VM has a default outbound IP, which is insecure and will no longer be assigned by default for new subnets after March 2026. To secure your VM and subnets and ensure future compatibility, follow guidance to add an explicit method of outbound and set your subnets to private.
