Enable IP forwarding ☐

Virtual network: vnet

Gateway load balancer: None

Subnet *: default (10.1.0.0/24) 250 free IP addresses

250 free IP addresses

Private and public IP addresses can be assigned to a virtual machine's network interface controller. You can add as many private and public IPv4 addresses as necessary to a network interface, within the limits listed in the Azure limits article. Private IP address prefix types can only be created as a secondary IP configuration. Learn more

Add | Make primary | Delete

Name	IP Version	Type	Private IP Address	Public IP Address
ipconfig1	IPv4	Primary	10.1.0.4 (Static)	172.185.19.97 (vm1-ip)
